

# HartFort Team Med Visual For Dummies

Not to be shared with the general public, all pictures matches the doese on example medlist  
unless specified

Tylenol ([acetaminophen](#))

pain reliever and a fever reducer.

Norvasc (amlodipine)

calcium channel blocker that dilates (widens) blood vessels and improves blood flow.

## Ecotrin

used to treat pain, and reduce fever or inflammation.

Above is a 325 mg tab, I didn't find a picture of a 81mg tab

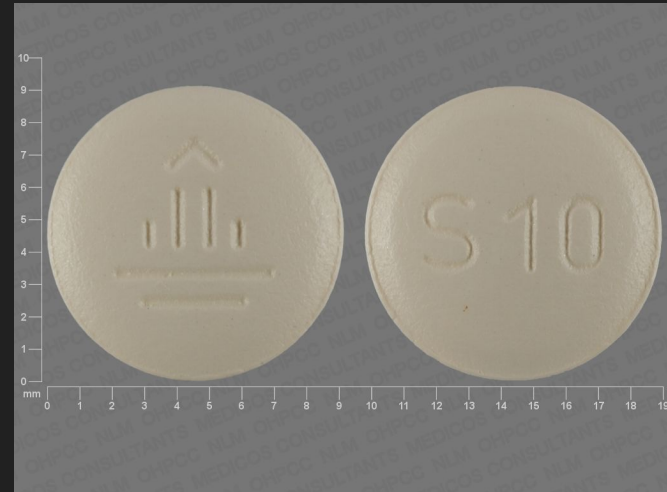

## Wellbutrin XL

antidepressant used to treat [major depressive disorder](#) and [seasonal affective disorder](#). The [Zyban](#) brand of [bupropion](#) is used to help people stop [smoking](#) by reducing cravings and other withdrawal effects.

Jardiance ([empagliflozin](#))

oral diabetes medicine that helps control blood sugar levels. Empagliflozin works by helping the kidneys get rid of glucose from your bloodstream.

Cresemba ([isavuconazonium](#))

antifungal medication that fights infections caused by fungus.

## Magnesium lactate

a naturally occurring mineral that is needed in the body to support the function of the heart, nervous system, and digestive system.

used as a mineral supplement to treat magnesium deficiency.

## CellCept ([mycophenolate mofetil](#))

weakens your body's immune system, to help keep it from "rejecting" a transplanted organ such as a kidney. Organ rejection happens when the immune system treats the new organ as an invader and attacks it.

## Prilosec (omeprazole)

a proton pump inhibitor that decreases the amount of acid produced in the stomach.

used to treat symptoms of [gastroesophageal reflux disease \(GERD\)](#) and other conditions caused by excess stomach acid. Omeprazole is also used to promote healing of [erosive esophagitis](#) (damage to your esophagus caused by stomach acid).

may also be given together with antibiotics to treat gastric ulcer caused by infection with *Helicobacter pylori* (H. pylori).

## Prednisone

provides relief for inflamed areas of the body. It is used to treat a number of different conditions, such as inflammation (swelling), severe allergies, adrenal problems, arthritis, asthma, blood or bone marrow problems, endocrine problems, eye or vision problems, stomach or bowel problems, lupus, skin conditions, kidney problems, ulcerative colitis, and flare-ups of multiple sclerosis. Prednisone is a corticosteroid (cortisone-like medicine or steroid). It works on the immune system to help relieve swelling, redness, itching, and allergic reactions.

## Senna

likely effective in alternative medicine as an aid in treating occasional [constipation](#) in adults and children at least 2 years old. Senna is sometimes used together with another laxative or stool softener such as [lactulose](#), [psyllium](#), [docusate](#), or [mineral oil](#).

## Epclusa

combination of [sofosbuvir](#) and velpatasvir. Sofosbuvir and velpatasvir are antiviral medications that prevent hepatitis C virus (HCV) from multiplying in your body.

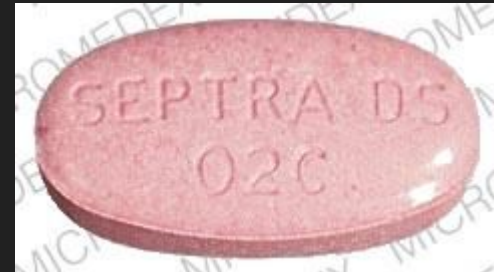

## Bactrim DS (800 - 160)

treat or prevent bacterial infections

## Septra DS

Sulfamethoxazole and trimethoprim combination is used to treat infections including urinary tract infections, middle ear infections (otitis media), bronchitis, traveler's diarrhea, and shigellosis (bacillary dysentery). This medicine is also used to prevent or treat *Pneumocystis jirovecii* pneumonia or *Pneumocystis carinii* pneumonia (PCP), a very serious kind of pneumonia. This type of pneumonia occurs more commonly in patients whose immune systems are not working normally, including cancer patients, transplant patients, and patients with acquired immune deficiency syndrome (AIDS).

## Prograf ([tacrolimus](#))

weakens your body's immune system, to help keep it from "rejecting" a transplanted organ such as a kidney. Organ rejection happens when the immune system treats the new organ as an invader and attacks it.

## Valcyte

antiviral drug. It works by preventing viral cells from multiplying in your body.

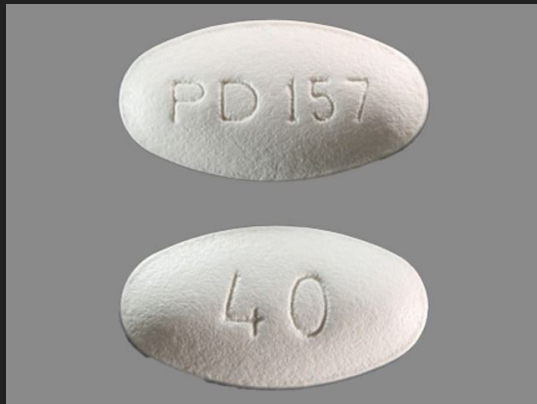

used in adults to prevent infection with cytomegalovirus (CMV) that may occur after an organ transplant (heart, kidney, or pancreas). This medicine is also used to treat [CMV infection](#) of the eye in adults with acquired immunodeficiency syndrome (AIDS).

Lipitor ([atorvastatin](#))

used together with diet to lower blood levels of "bad" cholesterol (low-density lipoprotein, or LDL), to increase levels of "good" cholesterol (high-density lipoprotein, or HDL), and to lower triglycerides (a type of fat in the blood).

used to treat high cholesterol, and to lower the risk of stroke, heart attack, or other heart complications in people with type 2 diabetes, coronary heart disease, or other risk factors such as genetically high cholesterol.

Remeron ([mirtazapine](#))

an [antidepressant](#). The way mirtazapine works is still not fully understood. It is thought to positively affect communication between nerve cells in the central nervous system and/or restore chemical balance in the brain.

Myfortic (mycophenolic acid)

immunosuppressant that weakens your body's immune system. Your body may "reject" an organ transplant when the immune system treats the new organ as an invader and attacks it. An immunosuppressant helps to prevent this rejection.

Zofran (ondansetron)

prevent nausea and vomiting that may be caused by surgery, cancer [chemotherapy](#), or [radiation](#) treatment.

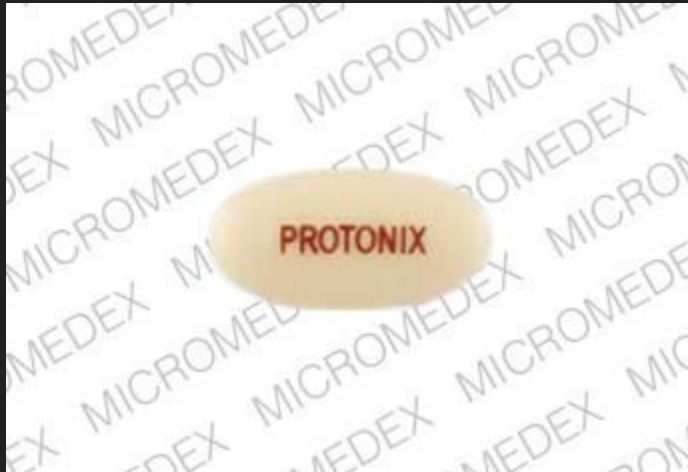

### Protonix ([pantoprazole](#))

proton pump inhibitor that decreases the amount of acid produced in the stomach.

used to treat [erosive esophagitis](#) (damage to the esophagus from stomach acid caused by [gastroesophageal reflux disease](#), or [GERD](#)) in adults and children who are at least 5 years old.

Pantoprazole is usually given for up to 8 weeks at a time while your esophagus heals.

### Bactrim (400-80)

treat or prevent bacterial infections

## Demadex

loop diuretic (water pill) that is used to treat **fluid retention** (**edema**) in people with **heart failure**, **liver disease**, or kidney disease.

used to treat **high blood pressure** (hypertension). Lowering blood pressure may lower your risk of a stroke or **heart attack**.

## Zyloprim

used to prevent or lower high uric acid levels in the blood. It is also used to prevent or lower excess uric acid levels caused by cancer medicines or in patients with kidney stones. A high uric acid level can cause gout or gouty arthritis (joint pain and inflammation). Allopurinol is a xanthine oxidase inhibitor that works by decreasing the uric acid produced by the body.

## Ascorbic acid (vitamin C)

occurs naturally in foods such as citrus fruit, tomatoes, potatoes, and leafy vegetables. Vitamin C is important for bones and connective tissues, muscles, and blood vessels. Vitamin C also helps the body absorb iron, which is needed for red blood cell production.

Above is a 200 mg / 250 IU tab, I didn't find a picture of a 250 mg tab

## Drisdol is vitamin D2

Vitamin D helps your body absorb calcium.

used to treat hypoparathyroidism (decreased functioning of the parathyroid glands).

also used to treat rickets (softening of the bones caused by vitamin D deficiency) or low levels of phosphate in the blood (hypophosphatemia).

Neurontin (gabapentin)

an anti-epileptic drug, also called an anticonvulsant. It affects chemicals and nerves in the body that are involved in the cause of seizures and some types of pain.

used in adults to treat neuropathic pain (nerve pain) caused by herpes virus or shingles (herpes zoster).

also used to treat seizures in adults and children who are at least 3 years old.

NovoLog FlexPen

is used to improve blood sugar control in adults and children with diabetes mellitus. NovoLog FlexPen is sometimes used together with a long-acting or intermediate-acting insulin.

Levemir ([insulin detemir](#))

is a man-made form of insulin, a hormone that is produced in the body. Insulin works by lowering levels of glucose (sugar) in the blood.

is a long-acting insulin that starts to work several hours after injection and keeps working evenly for up to 24 hours.

Xopenex ([levalbuterol](#))

is a short-acting bronchodilator that relaxes muscles in the airways and increases air flow to the lungs.

is used to treat or prevent [bronchospasm](#) in people with reversible obstructive airway disease.

Synthroid (levothyroxine)

is a thyroid medicine that replaces a hormone normally produced by your thyroid gland to regulate the body's energy and metabolism.

is a prescription medicine used to treat hypothyroidism (low thyroid hormone).

Levothyroxine is given when your thyroid does not produce enough of this hormone on its own.

is also used in patients who need surgery and radioiodine therapy to manage a type of thyroid cancer called well-differentiated thyroid cancer.

Levothroid(Levothyroxine )

is used to treat hypothyroidism, a condition where the thyroid gland does not produce enough thyroid hormone. Levothyroxine is also used to help decrease the size of enlarged thyroid glands (also called a goiter) and to treat thyroid cancer.

## Multivitamin

## Singulair (montelukast)

leukotriene (loo-koe-TRY-eeen) inhibitor. Leukotrienes are chemicals your body releases when you breathe in an allergen (such as pollen). These chemicals cause swelling in your lungs and tightening of the muscles around your airways, which can result in asthma symptoms.

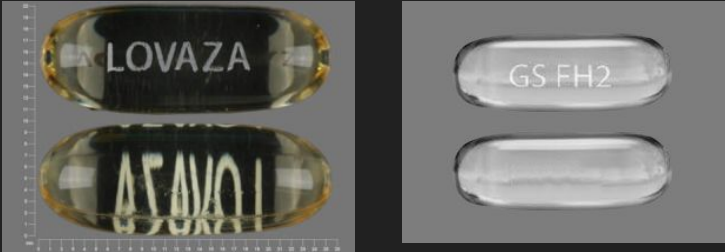

used to prevent asthma attacks in adults and children as young as 12 months old. Singulair is also used to prevent exercise-induced bronchoconstriction (narrowing of the air passages in the lungs) in adults and children who are at least 6 years old.

also used to treat symptoms of year-round (perennial) allergies in adults and children who are at least 6 months old. It is also used to treat symptoms of seasonal allergies in adults and children who are at least 2 years old.

Lovaza

used together with diet and exercise to help lower triglyceride levels in the blood.

## One Touch Verio

## One Touch Delica Lancets 30G

## alcohol swabs
